

ENT Instruments

Sets for ENT diagnostic and surgery

allgaier
instrumente
medical

Since 1983, **Heinemann Medizintechnik** is one of the leading equipment providers in **ENT medical technology**.

The company is not only a **manufacturer** of high-quality ENT treatment units, but also a **competent** partner for practice planning as well as your sales **partner** for complete ENT equipment in **hospitals** and private practices.

Below you will find ready-made instrument sets for diagnostic and surgical ENT areas from the company Allgaier Instrumente GmbH in our catalogue. The sets could help you when setting up a new ENT workstation, but also as a supplement for an existing one. Surgical sets represent a minimum requirement for the respective operating theatre, which you can of course supplement with further instruments.

The allgaier instrumente GmbH company is a family business that was founded in 1953. Since its foundation, the company has been dealing with surgical instruments and instruments - always with the idea of quality in the foreground. Because the field of application of the products is the human being and therefore quality is of special importance. The steady growth of the company has proved them right.

The range of products has been steadily expanded, which today amounts to approximately 26,000 items. Due to this wide range of products, the uncompromising attitude towards the quality and workmanship of the instruments, together with devices from almost all fields of medical technology, the company today enjoys good reputation worldwide and sells its products on all continents in more than 80 countries.

The products are generally used in the general/open surgical, dental and minimally invasive fields. Continuous market observation, closeness to the user, a high level of interest, curiosity and experience have created skills and know-how over time which are reflected in the functionality, ergonomics and very high quality standard. At Allgaier, medical technology instruments are manufactured in an optimised process by state-of-the-art machines and skilled personnel with manual dexterity skillful craftsmanship.

...we can do it!
